May 7, 2011

We have been working diligently on the second Hampton Avenue parking area as well as making changes inside and outside of the Fellowship Hall. Of course, the BIGGEST changes have been made in the new auditorium addition. If you've not had a chance to see all these changes in person, we hope it will encourage you to see these photos of the progress being made on the MCBC campus.

The youth are faithfully working on the second Hampton Avenue parking area.

Pavers are being installed all the way around the Fellowship Hall in preparation for our using the Fellowship Hall for services beginning in August.

Removing blocks from inside to facilitate new door

Installing bond beam above where the new door would be

Temporary glass doors--permanent doors on order.

The first piece of steel goes up!

More steel . . .

And still more steel.

Steel construction as of today

The steel construction should be completed by the end of the week, and the exterior walls will begin going up this Monday.

Lunchtime on MCBC Campus

MISCELLANEOUS INFORMATION

- ❖ We are in the process of adding 14 more security cameras on the MCBC campus to protect parking lots, bus parking areas, Warehouse, Fellowship Hall, and the Church. These cameras will also help our parking lot attendants in their guarding of the parking lots during services.
- ❖ The Audio/Visual contract was awarded this week, so things not-seen are happening also.
- ❖ Construction is on schedule. Please continue to pray for safety for all the workers.
